SUMMARY

Information Systems student specializing in SOC operations, Detection Engineering, and Enterprise Security.

Hands-on experience building SIEM pipelines, simulating real-world attack scenarios, and developing automated response systems.

Seeking an entry-level role in SOC, Network Security, or IT Infrastructure.

EDUCATION

B.Sc. in Computer Systems and Information | MCI Academy | Aug 2022 – Jun 2026 (Expected)

Diploma in Technology (5-Year Program) | Jalal Fahmy German Technical Secondary School

Graduated: 2022 | Graduation Project Team Lead coordinated team tasks and project delivery

INTERNSHIP EXPERIENCE

ZeroSploit MEA | SOC & Detection Engineering Trainee | El Agouza (Hybrid) | Oct 2025 – Jan 2026

- Designed end-to-end log pipelines using ELK Stack (Windows WEF & Linux logs)
- Created Kibana dashboards for log analysis and visualization
- Developed SOAR automation workflows using n8n for vulnerability remediation and incident response
- Simulated Active Directory attacks and built Sigma-based detections mapped to MITRE ATT&CK
- Integrated multi-vendor solutions (Palo Alto, Microsoft Sentinel) in lab environments

CyberTalents | Penetration Testing Boot Camp | Oct 2025 – Nov 2025

- Performed information gathering and web vulnerability assessments

WE INNOVATE | SOC Boot Camp (Creativa Hub) | Sep 2025 – Oct 2025

- Deployed SIEM system (ELK Stack) with SOAR automation (n8n)
- Analyzed security events and configured log collection

NTI | Windows Server Admin | Aug 2025 – Sep 2025

- Configured AD DS, DNS, DHCP, and Group Policy
- Implemented failover clustering and disaster recovery in virtual lab

ITI | Network Infrastructure | Jun 2025 – Jul 2025

- Applied routing, switching, and cloud fundamentals in lab environment

AMIT Learning | SOC Boot Camp | Jun 2023 – Sep 2023

- Monitored alerts and analyzed incidents using IBM QRadar
- Conducted basic malware investigation and reporting

ITI | Network Security | Aug 2023

- Led team activities while working on network security protocols
 - Gained hands-on experience with Palo Alto and FortiGate firewalls
-

TECHNICAL SKILLS

Cybersecurity : ELK Stack, QRadar, SOAR (n8n), Incident Response, Digital Forensics

Windows Server: Active Directory, GPO, DNS, DHCP, Failover Clustering

Linux: User & Permission Management, System Monitoring, Shell Scripting

Networking: TCP/IP, Routing & Switching, VLANs, Subnetting

Firewalls & Security Devices: Palo Alto, FortiGate (Rule Config & Traffic Monitoring)

SOFT SKILLS

Problem solving, Team Leadership, Public speaking, Technical Documentation, Continuous Learning

CERTIFICATIONS & PROJECTS

Professional Certifications:

- Cybersecurity Foundations — **Infosec**.
- Google Cybersecurity & Information Technology — **Google**.
- Junior Cybersecurity Analyst Career Path — **Cisco Networking Academy**.

Technical Projects :

Smart BI Reporting System (Graduation Project) : Web app where users upload Excel files and receive instant preliminary analysis followed by a detailed AI-driven report via email.

Enterprise Security Simulation : Built a zoned network lab (External, DMZ, Internal) to practice attack & defense scenarios

Active Directory Attack Detection : Simulated multi-stage AD attacks, developed custom Sigma rules, built detection pipelines

SIEM & SOAR Home Lab : Centralized monitoring system with automated alert analysis, email notifications, and simple dashboards

Enterprise Infrastructure Simulation : Managed a simulated enterprise environment with Active Directory, Group Policy, user management, and virtual multi-machine setup

Movie Market Web App : Developed a cinema booking platform using ASP.NET Core MVC, 3-tier architecture, and SQL Server

Database & Programming Projects : Designed ERD/EERD schemas and solved algorithmic challenges

LANGUAGES

Arabic: Native

English: Very Good(Professional Working Proficiency)
